## Introduction

I want to sincerely thank you for making the effort to learn more about numerology.

As a very spiritual person and numerologist, my intention is to simply help you understand who you really are, through the power of numerology.

Once you're aware of how to start decoding the vast amounts of information encoded in your name and date of birth, I'll show you practical ways to use it and enhance your lifestyle and wellbeing.

As you grasp the basics and understand how to decode the key numbers in any date of birth, you'll be able to practically know anybody (i.e. the real person) inside out!

Although numbers are only perceived as 2 dimensional, they are very real on an energetic level and affect the world around us, whether we're aware of it or not.

As you begin to understand the effect numbers have on each of us and what underlying energy each number represents, you can then start to use them to your advantage in your everyday life.

I'll highlight some of the ways I personally use numbers to my advantage, including how to attract more money (very simple indeed), just do exactly what I show you!

By the end of this guide, you will effectively become a mini-numerologist and at the very least, able to have a bit of fun with your friends and family, you'll then understand why they act the way they do, there's no hiding place 😊.

If our paths cross in the future, I very much look forward to meeting you and talking numbers and spiritual stuff (if you're into that too!).

Thank you once again, I sincerely hope you gets lots of value from this educational guide and put all the information to good use.

With love & blessings

## What is Numerology?

Numerology is the universal language and science of numbers which is said to have been created by Pythagoras, the Greek mystic and mathematician, more than 2,500 years ago.

It is based on the premise that **we are timeless souls** who have lived, and will continue to live, many lives for the purpose of evolving our soul through experiences and life lessons.

In our quest for self-mastery, we choose a known pre-set agenda for each life, consisting of the specific lessons we'd like to learn and the destiny we'd like to fulfil, during that lifetime.

The **details of all this, can be found in our 'numbers'** or more specifically our name and date of birth.

**Drum roll..... your name and date of birth are no accident...you specifically chose them!**

Let's go a little bit deeper...

Your soul comes from the spirit dimension whereas your body comes from the earth dimension. They come together at some point in the gestation period (pregnancy) as a beautiful divine creation, this is when your soul enters the unborn fetus in readiness for your birth and life as one.

It's your unborn body (prior to your soul entering it) which holds the **energetic blueprint** of who you are and what you are destined to be in this lifetime. Your soul then enters the body and you emerge from the womb on the pre-determined date of birth, carrying the energetic blueprint for your chosen path and destiny.

The energies within the blueprint are basically a set of frequencies encoded with everything you energetically need (characteristics, skills, traits etc) for the lifetime you have chosen.

And how do we measure and quantify anything? With numbers and letters of course.

If you know how to fully encode your name and date of birth you will find layer upon layer of information about yourself. That's what numerology does 😊.

People often joke that we don't get a rule book for our lives, yet we have the blueprint right under our nose and most people haven't a clue! It's all there in your numbers!

### How it actually works (snapshot)?

Each number in your date of birth and full name (n.b. each letter in your name converts to a number between 1 – 9 with numerology) represents a vibrational frequency.

Your name and date of birth obviously have the individual letters and numbers which all have individual frequencies, in addition to these, there are multiple other layers of frequencies contained within.

All these individual and layered frequencies correspond to the necessary skills, personality traits, characteristics, emotions etc, needed for your journey, experiences and lessons you wanted during **this** lifetime.

**But surely my parents chose my name?...I hear you ask!**

They did officially name you, but what really happened is you quietly influenced (planted your name in their minds) your parents from the spiritual realm.

So, encoded in your name and date of birth is your soul's blueprint for this lifetime that was set-in motion long before you entered this world.

Numerology is the key to helping us decode this powerful information that we have all forgotten, it will help you see the bigger picture and discover the real you!

**Why don't we remember any of this?**

Because we incarnate for the purpose of wisdom and growth for the soul, we have our memories wiped when entering the foetus, this is often referred to as the 'vale of amnesia.' If we carried all the soul's wisdom through each incarnation, we'd already be wise and wouldn't benefit from the lessons and growth our souls are seeking through each human experience.

Planet earth is effectively a school that we have all chosen to come to with eagerness and excitement because of the wonderful opportunity it offers us for developing our souls through experiences.

Unfortunately, because our memories are wiped prior to birth and nobody really explains this stuff to us, we pretty much must try to figure it all out, the majority never do!

Fortunately, through Numerology and similar spiritual disciplines we can begin to understand our true purpose in this lifetime and the specific lessons we came here to learn 😊.

### **Video assistance**

I've taken the liberty of also embedding a few videos from the [know thyself numerology](#) you tube channel in certain places. This gives you the option to watch me explain certain aspects, if preferred. If you see a video screenshot or hyperlink, this denotes a link to a corresponding video or webpage.

### **Mistakes**

You may notice the odd grammatical mistake in the written traits/characteristics on a few of the graphics. Please excuse this, a lot of the information is channelled through my guides and I just let it flow as it comes through (and don't even notice in that state) but I have kept it in for authenticity, so please go easy on me 😊.

## The Energetic Meaning of Each Number

In a nutshell, there are only 9 numbers to deal with in Numerology, 1, 2, 3, 4, 5, 6, 7, 8 & 9 that's it 😊 you don't need to know any others, not even 0 as it has no effect!

The reason is that every number in existence, no matter how big, reduces down to a number between 1 – 9, I'll show how this works very shortly.

The only exception to reducing down is sometimes when we have a sequence of the same numbers such as 11, 22, 33 etc. These are referred to as master numbers as they carry additional energy, you'll get the gist as we go through it.

**Reducing down**, simply means adding all the digits in a number together (and then the total if required) until you have a single digit between 1 - 9, here are some examples;

the number 31 would reduce to 4 ( $3 + 1 = 4$ ).

the number 248 would reduce to 5 ( $2 + 4 + 8 = 14, 1 + 4 = 5$ ).

the number 2019 would reduce to 3 ( $2 + 0 + 1 + 9 = 12, 1 + 2 = 3$ ),

The same applies to letters, in western numerology all 26 letters correspond to a number between 1 – 9 as follows;

A	B	C	D	E	F	G	H	I
1	2	3	4	5	6	7	8	9
J	K	L	M	N	O	P	Q	R
1	2	3	4	5	6	7	8	9
S	T	U	V	W	X	Y	Z	
1	2	3	4	5	6	7	8	

So, every number and letter corresponds to an underlying energetic frequency between 1 – 9 and once you know how to interpret these 9 basic frequencies, you're effectively a mini numerologist 😊!

Here's the general energetic meaning of the numbers 1 – 9;

- 1 ~ Individualistic, Independent
- 2 ~ Cooperation, Peacemaker
- 3 ~ Creative, Expressive
- 4 ~ Worker, Process, Foundations
- 5 ~ Freedom, Adventure

**6 ~ Nurturer, Caretaker**

**7 ~ Truth-seeker**

**8 ~ Power, Abundance, Finance**

**9 ~ Humanitarian, Global Awareness**

I've kept the traits very generic for simplicity, each number has a lot of depth with both positive and negative traits.

### **Negative Traits**

If you'd like to know the negative traits of each of the 9 numbers, click on the video image.

All the numbers are sequentially connected and reflect a complete journey or cycle, as follows...

1. **Ignition** ~ the birth of a new journey, full of energy and ambition.
2. **Feeling Life** ~ emotional seesaw (duality), relating to another.
3. **Expressing Life** ~ adds inspiration and expression to create new ideas.
4. **Erecting the Structure** ~ down to earth, bringing ideas into reality.
5. **Exploring the structure** ~ a quest for knowledge, experience and discovery.
6. **Vision of Perfection** ~ seeking fulfilment through harmony and perfection.
7. **Realising Perfection** ~ mystical transformation, seeks to heal life.
8. **Perfection Reworked** ~ the strategist and organiser, rework and rebuild.
9. **Completing the cycle** ~ dispensing the knowledge/wisdom of the journey.

## **Your Personal Set of Core Numbers**

Each of us has a core set of 7 numbers embedded in our date of birth and name. It's the energetic interactions of these numbers blended together that make up a large proportion of who we are and what we came here to do/ learn/achieve in this lifetime.

This is exciting stuff as your numbers reveal **everything** about you 😊

The 7 core numbers and their meanings are as follows:

**Your Life Path** ~ The path you will walk in this lifetime

**Your Birthday Number** ~ Your natural talents & abilities

**Your Destiny Number** ~ What you're destined to become

**Your Soul Number** ~ What your soul needs to feel content (soul purpose)

**Your Personality Number** ~ How others perceive you

**Your Maturity Number** ~ Your future potential as you mature (around 35 – 50)

**Your Current Name Number** ~ Your additional strengths, lessons & experiences

*Other considerations to note:*

*Remember, every number has positives and negative connotations.*

*No number is good or bad, or better than another number, they all have useful characteristics, potential challenges and their place in the world.*

The 2 most influential numbers in your life are your **life path number** and your **birthday number**, which we'll now focus on a great deal.

### ***Your Life Path Number (Most Influential Core Number)***

Here's demo of how to work out your life path;

All you do is add together all the digits in your date of birth and then add the 2 digits in the total (known as reducing down) so you have a single figure. The only exception to reducing down to a single figure is if you get to 11, 22 or 33 as these are known as master numbers.

There are 12 life paths in total, 1, 2, 3, 4, 5, 6, 7, 8, 9, 11, 22 & 33.

Here are 3 examples of how to work to work them out;

**E.g.1;** let's use 05<sup>th</sup> October 1969:

Add all the digits...  $0+5+1+0+1+9+6+9 = 31$

Now add  $3+1= 4$

A person born on 5<sup>th</sup> Oct 1969 is a **life path 4**.

Life path 4's can be summarised as **the dedicated workers** of society, if you want to get things done, make sure you have some life path 4's on your side.

**E.g.2;** 07<sup>th</sup> October 1992:

Add all the digits...  $0+7+1+0+1+9+9+2 = 29$

Now add  $2+9= 11$  (not reduced any further)

A person born on 7<sup>th</sup> Oct 1992 is a **life path 11**.

Life path 11's can be summarised as **intuitive healers**, they make very good teachers, healers and friends

**E.g.3;** 04<sup>th</sup> Sept 2018:

Add all the digits...  $0+4+0+9+2+0+1+8 = 24$

Now add  $2+4= 6$

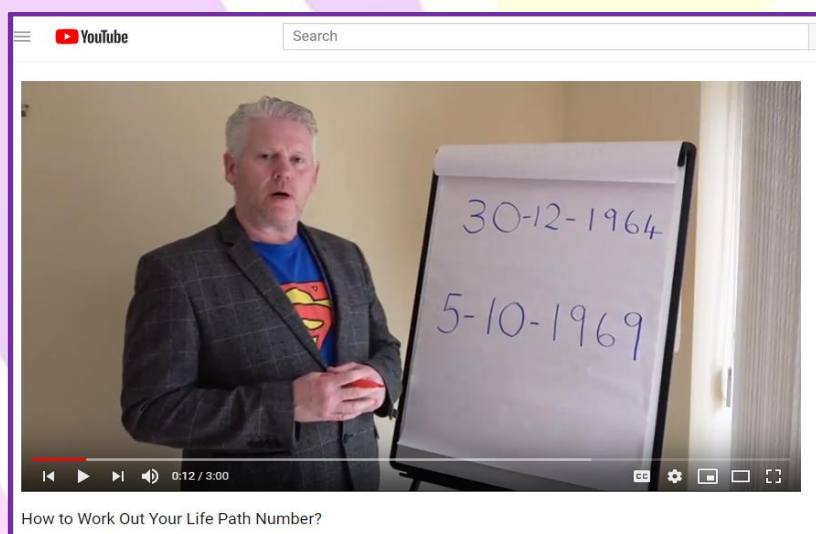

A person born on 4<sup>th</sup> Sept 2018 is a **life path 6**.

Life path 6 can be summarised as **nurturing caregivers**, they want to look after everybody and make great parents.

**Now, let's work out your life path;**

Your date of birth:  $\boxed{D} + \boxed{D} + \boxed{M} + \boxed{M} + \boxed{Y} + \boxed{Y} + \boxed{Y} + \boxed{Y} = \boxed{T} \boxed{T}$

Reducing the total:  $\boxed{T} + \boxed{T} = \boxed{L}$  life path.

## Birthday Numbers Explained

Your birthday number holds lots of information about your personality traits. It is the second most influential number in your personal numerology chart.

It is very simple to work out, it's the day of the month you were born, so if you were born on the 1<sup>st</sup> you're a **1 birthday** number, born on the 2<sup>nd</sup> you're a **2 birthday** number and so on.

If you were born after the 9<sup>th</sup> of the month, you just add the 2 figures in the date and reduce to a single figure between 1 – 9. Examples:

- i) Born on 16<sup>th</sup> of the month, you would be a **7** (1 + 6) **birthday** number
- ii) Born on the 26<sup>th</sup> of the month, you would be an **8** (2 + 6 = 8) **birthday** number

## The Elements ~ Big Influence on Mating & Dating!

Have you ever wondered why you hit it off with some people but clash with others?

Have you ever had a relationship (partner, friend or colleague) where you get on very well most of the time, but occasionally, one of you loses it and explodes?

You could say the tension builds up over time to a tipping point and then the frustration is unleashed!

Ever had that?

We'll come to romantic compatibility shortly and explain how life path energies interact as we all have natural and compatible matches along with the odd challenge, dependent on our own life path.

However, as we've just gone through the elements with the birthday numbers, now is a good time to cover the influence of these elements as they'll help you understand a lot about human behaviour!

There are 4 elements;

### Air, Water, Fire & Earth.

As you now know, we each have a ruling element connected with our birthday number and when we interact with others, our elements interact too (our energies are constantly interacting). Let's have a look at all the interaction combinations...

- **Fire & Air** ~ Fire needs air so they get on 'like a house on fire!' **natural match** 😊
- **Fire & Water** ~ Fire can boil the water & water can put out the fire, **potential conflict!**
- **Air & Water** ~ Air can cause a tsunami with water, **potential conflict!**
- **Fire & Earth** ~ The earth happily allows fire to happen, **natural match** 😊
- **Air & Earth** ~ The earth is happily surrounded by air, **natural match** 😊
- **Water & Earth** ~ The earth is happily covered by around 70% water, **natural match** 😊

Earth is effectively neutral, it's supports all the elements, so anybody with an earth element (6 & 8 birthdays) should generally get on with everyone.

It's the interactions between fire & water along with air & water where the energy can potentially conflict and cause tension.

**Reality check** ~ In your mind, quickly scan some of the people close to you (whose birthday number you know) where there's been the occasional bit of tension/conflict and check how the elements interact...are they compatible or conflicting?

## Let's Talk About Romantic Compatibility 😊

When it comes to finding a life partner, a business partner or for that matter, anybody who you'll naturally get along with, we use 2 key factors in numerology;

1. Is the elemental interaction as shown on page 21.

2. Is the Life Path interactions.

Although you'll need to find out your potential partner/friend's date of birth, to work out the life path interaction, it is well worth the effort, especially if its mating and dating related ❤️

Energetically we can grade the interactions in 3 categories as follows;

- **Natural matches** ~ generally feels effortless to get along.
- **Compatible matches** ~ should get along fine but may need the odd bit of effort.
- **Challenge** ~ potential to get along but you may clash or just not feel it!

N.b. master numbers 11, 22 & 33 all revert to their respective underlying life path numbers of 2, 4 & 6 for life path compatibility purposes.

Here's are the charts to see how all the life paths energetically interact;

**Awareness is the Key!**

Now we've gone through the 2 key interactions (life paths & elements) to determine the energetic compatibility between 2 people, please don't go and file for divorce if you find that both conflict, saying "Kirkbride says, it'll never work!" Just the awareness of this information is more than half the battle, just knowing yourself and your partner, allows

you to **understand** what's energetically going on and love & respect any differences (6).

## Decoding the Alphabet

As briefly mentioned on page 6, all 26 letters of the alphabet have an underlying number between 1 – 9 (as per image below) and also a gender, yes, each letter is either male or female.

### Arrows Snapshot (natural strengths in your birth chart)

Arrows in numerology represent your underlying natural strengths, there are 16 potential arrows in total. Not everybody has them, but the majority of the population has at least 1.

An arrow is depicted when 3 numbers or blank spaces line up vertically, horizontally or diagonally as your date of birth is placed in (i.e. corresponding numbers go together) the basic arrows grid.

Basic Arrows grid

3	6	9
2	5	8
1	4	7

#### Completing an arrows grid:

We simply place the date of birth (DOB) onto the arrows grid by placing each number (ignore any zero's) on top of the corresponding number, as follows;

Example 1:  
DOB: 30/12/1964;

3	6	9
2	5	8
1	4	7

30/12/1964 has 2 arrows:

- 1 vertical (1, 2, 3)
- 1 horizontal (3, 6, 9)

Example 2:  
DOB: 05/10/1969;

3	6	9
2	5	8
1	4	7

05/10/1969 has 1 arrow:

- 1 diagonal (1, 5, 9)

Here are 4 samples of the 16 arrows (inc the 3 shown above) and their meanings...

## How to Attract More Money With Numerology!

### Would you like to have more money flow into your life?

Money is always going to flow in and out of your life, how much you keep is down to how you handle it. However, you can enhance the flow coming into you by enhancing the abundance vibration around you!

How do you do it?

8 is the number of finance and abundance, by consciously placing the number 8 in key places around you and expecting more money, you'll will amplify the abundance vibration around you.

All you need to do is write the figure 8 on a piece of paper and place it in your purse/wallet with the expectation that money will easily flow to you, then watch what happens 😊. I suggest you also do the same with your phone if you use it for business purposes.

Who else uses this?

If I were to ask you to name the UK's most famous billionaire, who comes to mind? Most would say Richard Branson. Now if you look at the logo of his brand Virgin, what do you notice?

It is the infinity symbol which is the number 8 on its side, this is no coincidence! If you research the Chinese, you'll see they are obsessed with the number 8 and its link to prosperity.

There are a few more little tricks of how to fold it and what else to put in your wallet, I've put together a free bonus report for you, to explain further, you can download it at:

## The Energy of Your House Number

Everything we number, we add a corresponding energy, including houses.

I can pretty much guarantee when you first walked into your current house, it felt right, yes? You've probably also walked into other houses and immediately felt uncomfortable, right?

As everything is energy, your personal energy interacts with the houses energy and you get corresponding feeling.

To work out the energy, you just reduce your house number down to a single digit between 1 – 9 and the

following chart shows you what type of energy it emits.

**Now, would you like to know how to temporarily change the energy of your house anytime you wish (to suit daily plans), without officially changing the numbers?**

Let's say you live at number 41 ( $4 + 1 = 5$  energy) your house has the energy of 'nonstop excitement' which is ideal if you want a lively house or having a party.

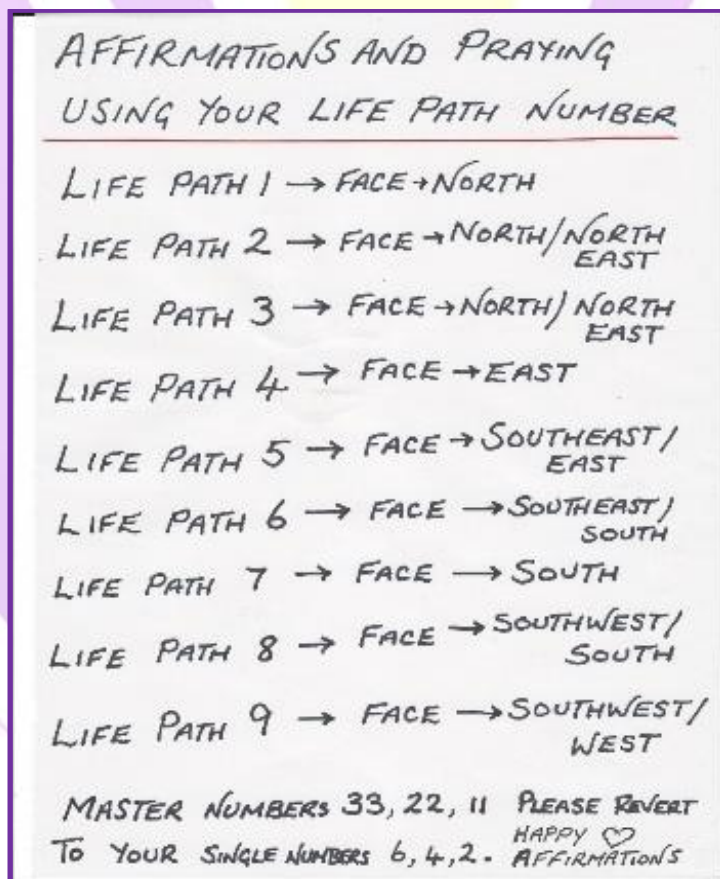

However, let's say you want a nice peaceful environment to study (7), all you need to do is write a number 2 on a piece of paper or post-it note and stick on the inside of the door (or by the hinges if you don't want it to be seen) along with the intention of having a peaceful/spiritual energy. This changes the house energy to a 7 ( $4+1+2$ ).

If this seems a bit too easy or you find it hard to understand how it could possibly work, I recommend looking up the work of Japanese scientist Dr Emoto who has proven beyond doubt that our thoughts change the crystalline structure of water. The house numbers work on the same energetic principle, the numbers have a natural energetic frequency which is then reinforced with your intent.

Try it, you'll be amazed!
